

Math for Data Science

Last modified: 2026-09-26 13:00:23 (PDT)

Welcome

These notes collect the mathematics that data science courses assume: notation, algebra, calculus, linear algebra and vector calculus.

- [Math prerequisites](#)

Using these notes in another site

Course sites include these notes as a git submodule named `mds` at the site's root, and include fragments with paths that start with `mds/`, for example `{< include mds/_math-prereqs.qmd >}}`. This site includes its own fragments the same way, through a `mds` symlink that points at the repository root.

Quarto resolves `@id` cross-references only within one rendered page, so a host site that links to a result here uses an explicit link, `[text] (math-prereqs.qmd#id)`.
